

Sabre Resources Activities Report for Quarter Ended 31 March 2024

Sabre Resources Limited ("Sabre" or "the Company") continued to focus on growing and advancing its key energy metals and gold projects during the quarter ended 31 March 2024 ("the Quarter"). The Company is well-resourced to continue its exploration programs with cash of **\$5.3M** at Quarter's end.

Exploration Activities

Ngalia Basin, NT - High-Grade Uranium Prospects

During the Quarter Sabre continued exploration of its Dingo Uranium Project within the Company's 1,100km² tenement package in the highly-prospective Ngalia Basin uranium province, 300km northwest of Alice Springs in the Northern Territory (see Figure 1, below).

Exploration programs at the <u>Dingo Project</u> are following up on high-grade results of up to 5,194ppm eU₃O₈ identified in previous drilling¹, which tested the shallow-dipping Mt Eclipse Sandstone (MES) immediately to the south of the excised Camel Flat Mineral Resource of 211,300t @ 1,384ppm U₃O₈².

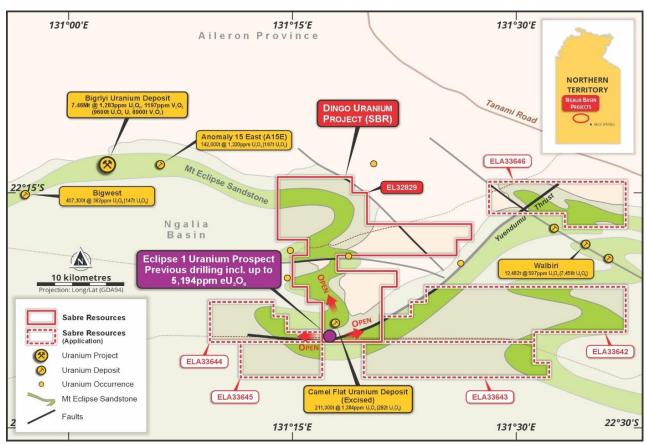

Figure 5: Dingo Project tenements showing uranium deposits in the area and targeted Mt Eclipse Sandstone

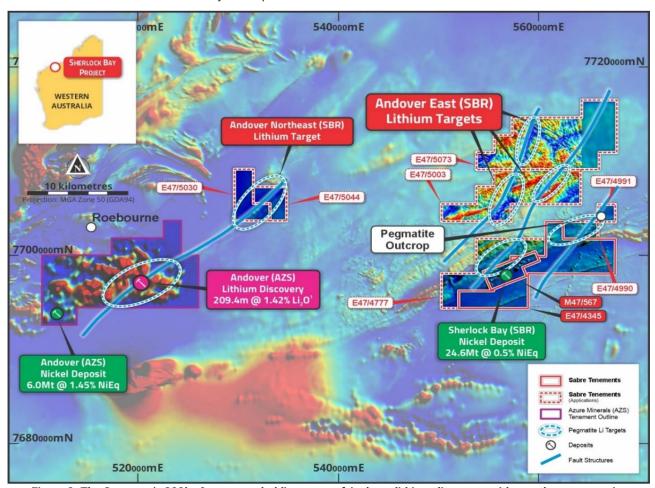

The high-grade uranium drilling results are from Eclipse 1 Prospect within the highly-prospective Mt Eclipse Sandstone, which is weakly magnetic and interpreted to continue for over 50km within the Company's granted tenements and new applications (Figure 1). **An extensive drone-magnetics program, in progress, will trace the MES under cover and define new targets for drill testing by the Company.**

Northwest Pilbara, WA - Andover East Lithium Targets and Sherlock Bay Nickel and Gold Targets

During the Quarter the Company continued exploration of its **expanded**, **300km²**, **ground holding in Western Australia's world-class northwest Pilbara lithium**, **nickel and gold province** (see Figure 2, below). These **major tenement holdings cover key targets on extensions and repeats of the northeast-trending corridor that hosts the major Andover lithium discovery** of Azure Minerals Ltd (Figure 2).

Imagery received from an ongoing, large-scale, drone magnetics survey over the Andover East³ and Andover Northeast⁴ targets has already defined three "Andover-look-alike" lithium-pegmatite and/or gold targets in geological settings analogous to the nearby Andover lithium discovery^{3,4} (see Figure 2).

These key targets are associated with northeast-trending magnetic lows interpreted to be potentially lithium-bearing pegmatite-hosting fault corridors within the predominantly magnetic mafic/ultramafic rocks⁵. This is a similar geological scenario to the Andover lithium discovery, which is associated with lithium-bearing pegmatites in a northeast-trending fault corridor which continues into the Company's Andover Northeast tenements⁴ (see Figure 2). While the lithium (in spodumene) pegmatites at Andover outcrop at surface, Sabre's Andover East and Andover Northeast pegmatite targets are located under soil/alluvium cover and are entirely un-explored.

 $\textit{Figure 2: The Company's 300} km^2 \ tenement \ holdings \ east \ of \ Andover \ lithium \ discovery, \ with \ new \ drone \ magnetics$

The drone magnetics program is in progress over the Andover Northeast target³, located 5km along strike from the Andover discovery (see Figure 1). Imagery from the drone-magnetics program will be interpreted and Lithium-pegmatite (and gold) targets defined for testing with aircore drilling to collect bedrock samples within key target areas for lithological description and bedrock geochemical analyses.

Sabre has also applied for WA government drilling co-funding to test electromagnetic targets within a major new nickel sulphide and gold target corridor – the Sherlock North Trend⁶ - immediately north of, and parallel to, the 20km Sherlock Bay sulphide corridor (Figure 2).

Eastern Goldfields, WA - Cave Hill Lithium Targets and Nepean South Nickel Targets

During the Quarter Sabre announced further, highly-anomalous, lithium and gold results from ongoing soil sampling over its extensive Cave Hill Project tenements⁷, which cover over 700km² of lithium-pegmatite, gold and nickel-sulphide target areas under shallow soil/alluvial cover in WA's highly-prospective Eastern Goldfields Lithium Province (see Figure 3, below).

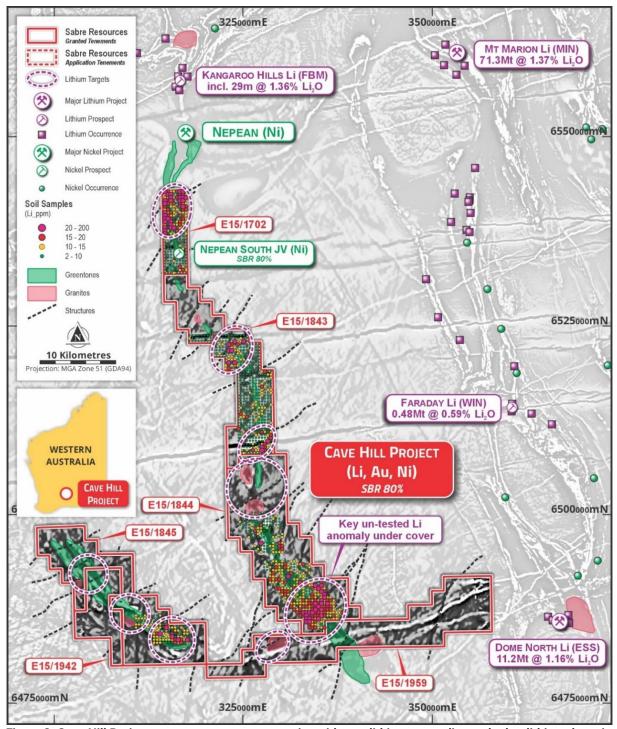

Figure 3: Cave Hill Project tenements on aeromagnetics with new lithium anomalies and other lithium deposits

The anomalous results have been received from a further 876 auger soil samples collected on a 400m x 400m grid, mostly from the largest and most prospective tenement, E15/1844 (see Figure 3). An extensive greenstone belt has been identified from magnetics within this tenement and a series of northeast-trending faults are interpreted to intersect the soil-covered greenstone lithologies, which could host lithium-bearing pegmatites. The most significant new lithium anomaly has dimensions of 5km x 5km and includes values of more than 10 times background (>20ppm Li vs background of 2ppm Li).

This large lithium anomaly occurs where interpreted northeast-trending faults cross this greenstone corridor – a setting associated with significant lithium deposits in the region, including the Kangaroo Hills lithium discovery which has produced lithium-spodumene intersections of up to $29m @ 1.36\% Li_2O^8$, and the Mt Marion Project of Mineral Resources Ltd (ASX:MIN) which has a large Mineral Resource of $71.3Mt @ 1.37\% Li_2O^9$ (see Figure 3).

Results from the previous program⁵ and in the recent survey also include **highly-anomalous gold results** of up to 32ppb Au, which is more than 10 times background for the area (~2ppb Au), (see Figure 4, below). The greenstone corridors within the Cave Hill tenements are continuations of the prolific Coolgardie Greenstone Belt which has produced over 2.8Moz of gold⁷ from the Coolgardie area alone.

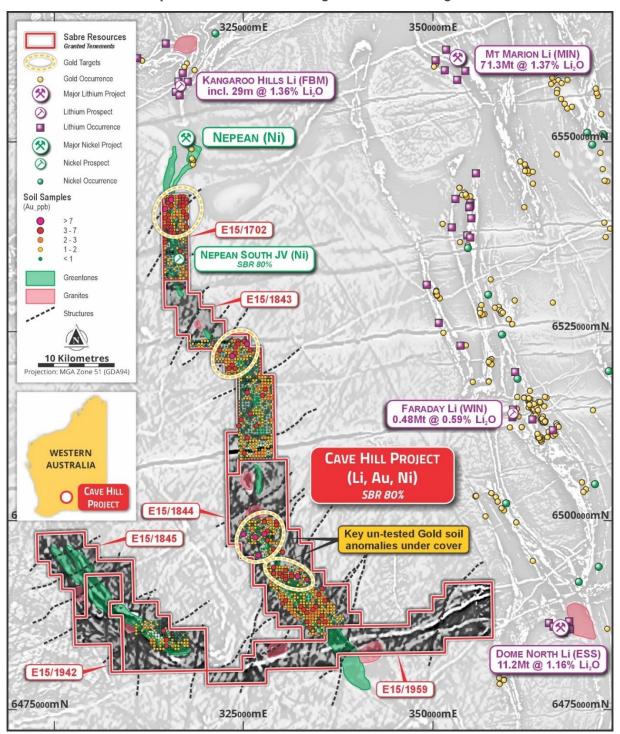

Figure 4: Cave Hill Project tenements on aeromagnetics with gold anomalies and other gold and lithium deposits

PoWs are in preparation for approval of initial drill-testing of these significant lithium and gold targets, commencing with aircore drilling, to be followed by deeper RC drilling of anomalous zones.

Ninghan Gold Project, WA

The Company's100% owned **Ninghan Gold Project**¹⁰ in Western Australia's southern Murchison district is less than **20km along strike from the Mt Gibson gold mine, which has a >3Moz gold resource endowment** (Mineral Resources plus production)¹¹. Previous RAB and aircore drilling at Ninghan has defined two strongly anomalous zones of gold mineralisation¹⁰.

A PoW has been submitted for approval to carry out aircore drilling to extend the anomalies, and selective RC drilling to test bedrock gold anomalies and other geophysical targets for high-grade gold deposits.

Corporate

Sabre's net expenditure for the Quarter was \$0.542 million, including direct exploration expenditure of \$0.244 million. The cash position of the Company as of 31 March was \$5.3 million. Payments to related parties of the entity and their associates was limited to payment of director fees and superannuation totalling \$8k (see Appendix 5B, Quarterly cash flow report attached).

Cautionary Statement regarding Forward-Looking information

This document contains forward-looking statements concerning Sabre Resources Ltd. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties, and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political, and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of, the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes.

Forward looking statements in this document are based on the company's beliefs, opinions and estimates of Sabre Resources Ltd as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions, and estimates should change or to reflect other future developments.

Competent Person Statements

The information in this report that relates to exploration results, metallurgy and mining reports and Mineral Resource Estimates has been reviewed, compiled, and fairly represented by Mr Jonathon Dugdale. Mr Dugdale is the Chief Executive Officer of Sabre Resources Ltd and a Fellow of the Australian Institute of Mining and Metallurgy ('FAusIMM'). Mr Dugdale has sufficient experience, including over 34 years' experience in exploration, resource evaluation, mine geology, development studies and finance, relevant to the style of mineralisation and type of deposits under consideration to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee ('JORC') Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves. Mr Dugdale consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

ASX Listing Rules Compliance

In preparing this announcement the Company has relied on the announcements previously made by the Company as listed under "References". The Company confirms that it is not aware of any new information or data that materially affects those announcements previously made, or that would materially affect the Company from relying on those announcements for the purpose of this announcement.

¹ Payment of director fees and superannuation.

² \$49,130 was received from the Western Australian government in the September quarter 2023, being the remaining 20% of its \$220,000 co-funding for the diamond drilling program to test high-grade nickel sulphide targets at Sherlock Bay, plus payments for core tray expenditure.

³ March quarter receipts included \$69,000 in costs incurred that were subsequently recouped, including administration costs relating to the Nepean South Joint Venture.

⁴ Two placements took place during the financial year to the end of March 2024. \$2,600,000 (before costs) was raised through the first, and \$700,000 (before costs) was raised from the second. Of the second placement, \$200,900 was received in December 2023 and \$499,100 was received in January 2024.

8.6	Total available funding (item 8.4 + item 8.5)	5,295
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	15.04
	Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.5. Otherwise, a figure for the estimated quarters of funding available must be included in item.	

Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

- 8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:
 - Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer:

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:

Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2024

Authorised by:

Michael Muhling – Company Secretary

On behalf of the Board of Directors

Notes

- 1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
